

Discover

Orion Health Discover is an analytics solution for exploring data stored in Orion Health systems

-  Interactive visualisations to filter and explore data
-  Permission-controlled download capability to support offline work
-  Hierarchy-based content restrictions for information governance compliance
-  Discover Desktop application to create custom dashboards and reports
-  Transforms data from Orion Health products into a reporting schema ready for exploration
-  Library of web-based dashboards and reports

The dashboards and reports in Discover assist health and care professionals, clinical team leads, analysts, change managers, privacy officers and executive management to understand and explore their data. Discover aids decision-making and timely interventions with the goal of improving clinical outcomes, patient and staff satisfaction, resource utilisation, information governance and financial performance.

Key Features

Login Date: Last 3 months | Hours: All | Login Type: (All)
 Organisation: (All) | Position: (All) | Role: (All)
 Facility: All | Specialty: All | Group: (All)

Discover
 Position: System Administrator
 Organisation: Countywide Care HIE

Interactive visualisations allow users to filter and explore data

Dashboards and reports are designed to enable the following interactions by end-users, as appropriate to each dashboard's intended use and subject to the user having the necessary permissions:

- Filters to adjust date range
- Filters to adjust date interval (year/ quarter/ month/ week/ day)
- Displayed additional information when hovering over a data point plotted on a chart
- Drill down to see additional insights
- Hover over for tooltips and context sensitive help

Hierarchy-based content restrictions

The content displayed in the dashboards and reports can be filtered based on the user's organisation. Depending on the configuration, users may view data only for their own organisation, or view data for related organisations for which they are accountable within the hierarchy of the wider health ecosystem.

Populates real-time data from Orion Health Products into a reporting schema

Extract, load and transform (ETL) processes are performed to populate the Discover Schema with data from Orion Health products. Architected for performant reporting, the schema is used to populate dashboards and reports.

Permission-controlled download capability to support offline analysis

The dashboards and reports can be downloaded as an image (PNG), data (CSV), document (PDF) or presentation (PPT), with permissions governed by access control, enabling additional analysis offline in third-party applications such as Microsoft™ Excel.

Discover Desktop application to create custom dashboards and reports

Discover includes a Desktop application through which additional dashboards and reports can be created by Orion Health professional services staff to address custom requirements. Dashboards are saved to source control and published through Orion Health’s standard automated deployment process onto the Discover Server.

Web-based access to dashboards and reports

Embedded in Clinical Portal, Discover allows users to view dashboards and reports. A set of out-of-the-box reports is available to customers with a library subscription. The library is constantly growing; every upgrade adds new insights.

Benefits

Improve your decision-making

Discover provides effective and efficient visualisations to end-users such as clinicians and administrators, to make informed and timely decisions that improve clinical outcomes, patient satisfaction, resource utilisation, information governance and financial performance.

Immediate value through the Discover Library

Get up and running quickly with a pre-configured set of out-of-the-box visualisations from the Discover Library.

As new dashboards and reports are developed for various customers globally, they will be added to the library, benefiting all Discover subscription customers.

Targeted and relevant content

Discover helps you to zero in on relevant insights by filtering out unrelated content. This prevents confusion for the user and addresses privacy concerns regarding patient identifiable data.

Each visualisation is designed to answer one or more questions you would routinely ask of your data.

Fast and easy to access

Users of Clinical Portal will find their reports and dashboards one click away thanks to single sign on.

Only authorised dashboards will be available depending on the user's profile, so that the user will view useful and related information only.

Reports just the way you like them

Discover Desktop is an application that allows new dashboards to be created to address local needs.

Kick-start new conversations and interactively explore your data by creating additional visualisations from your desktop, sharing the best of these with a wider audience through Clinical Portal.

Share content and collaborate

Discover allows you to save favorite filter combinations and share these with other users so they can quickly replicate reports you have designed.

Future-proof your journey from Population Health to Precision Medicine.

Every step you take toward delivering personalised healthcare is valuable. Our end-to-end solution—built on our Amadeus platform with real-time-analytics, clinical, and patient-engagement will future-proof your journey.
