

Orion Health x HEALWELL AI: A Healthier Future

Smart, frictionless, real-world AI-integrated healthcare.

Orion Health and HEALWELL AI are joining forces to revolutionize healthcare with AI-driven, data-powered solutions. We bring together the infrastructure to integrate data, intelligence to anticipate care needs, and the tools to take action.

Together, we're building the healthcare system people deserve: proactive rather than reactive, connected rather than fragmented, and grounded in evidence, not empty promises. With advanced AI-powered insights

and seamless data integration, we turn scattered information into connected, preventative care that works in the real world.

Rooted in global innovation and decades of experience in healthcare, this partnership is accelerating change where it matters most. It's delivering smarter decisions, earlier interventions, and better outcomes for patients and providers alike. This isn't a promise for someday—***it's progress backed by proof, happening today.***

The HEALWELL AI Ecosystem

HEALWELL AI brings together a best-in-class ecosystem of AI technologies and software focused on preventative care.

HEALWELL AI is building one of the world's leading healthcare technology groups, focused on artificial intelligence and data science for preventative care. Its ecosystem of companies includes leaders in clinical decision support, electronic health records, data integration, and clinical research. Together, these

technologies are enabling earlier detection, faster diagnoses, and more efficient care. With a strong foundation in evidence and a focus on real-world outcomes, HEALWELL is setting a new standard for intelligent, proactive healthcare.

AI & DATA SCIENCE

Khure Health – www.khurehealth.ca

Khure Health is an AI health technology company whose precision medicine platform harnesses clinical data, enabling physicians to rapidly screen and identify patients with rare diseases and facilitate more personalized treatment.

Mutuo Health Solutions – www.mutuohealth.com

Mutuo Health Solutions is a medical AI company focused on developing predictive clinical AI technology. Their flagship product, AutoScribe, is an advanced AI-powered ambient scribe solution that transcribes clinician-patient interactions into high-quality electronic medical records in real time.

Pentavere – www.pentavere.ai

Pentavere Research Group is a globally recognized and award-winning AI digital health company that has built a best-in-class AI engine to identify patients that are eligible for approved medications or interventions, to improve outcomes for patients. Over the past several years, Pentavere has published an impressive array of literature in high-impact, peer-reviewed medical journals, totalling more than 40 manuscripts and more than 50 real-world AI clinical studies.

HEALTHCARE SOFTWARE

Intrahealth – www.intrahealth.com

Intrahealth specializes in the development and implementation of state-of-the-art EMR solutions. With a relentless commitment to advancing patient care, Intrahealth empowers healthcare providers, institutions, and governments with innovative digital tools designed to enhance healthcare delivery and improve patient outcomes.

VeroSource – www.verosource.com

VeroSource Solutions is a digital health company established in 2014 to empower people and unlock the potential in Canadian healthcare. VeroSource's cloud-first multi-channel software securely connects people, data and systems to drive digital healthcare transformation.

Orion Health – www.orionhealth.com

Orion Health's world-leading Unified Healthcare Platform connects data across healthcare systems to deliver actionable insights, support clinicians, and empower people to take control of their own care. The platform includes the Virtuoso Digital Front Door and Amadeus Digital Care Record, each underpinned by extensive health and social data sets and 30 years of innovation focused purely on improving global well-being.
