

AMADEUS DCR

Health Information Exchange

Technology to power the future state health data landscape

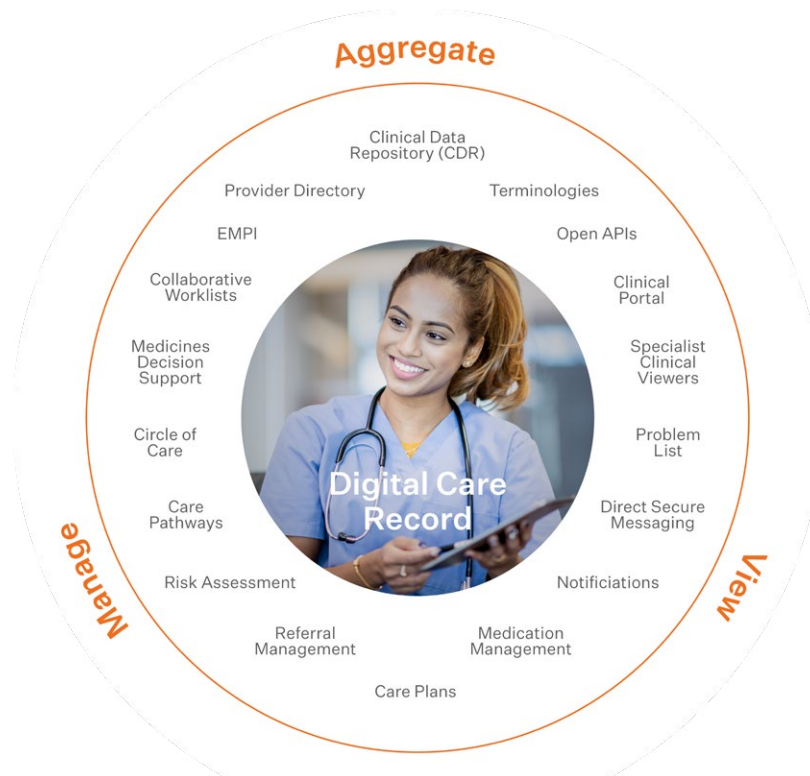

Orion Health's Digital Care Record (DCR) provides a Health Information Exchange (HIE) that consolidates patient data across care settings, enabling enhanced care coordination and population health management.

Our Digital Care Record enables health and care data to be aggregated in real-time from almost any source to provide health and care professionals with access to the complete patient record quickly, efficiently, and safely. This enables authorized healthcare professionals who contribute to care, from clinicians in hospitals and primary care to social care and beyond, to see just what they need at the time of care.

How can the Amadeus Digital Care Record help your Health Information Exchange make a difference?

- HIE participants can view your HIE data within their EMRs or enable browser-based access for community care providers
 - Access patient records with our modern clinical viewer with broad functionality and native AI tools
 - Bring together longitudinal patient records with any type of health or health-adjacent data
 - Improve access to data and position clinical teams to make better decisions, delivering more efficient and effective care
-

Center of Excellence**

Extending beyond the HIE

The SHDCoE is an opportunity for Orion Health to help all HIEs across the country navigate the transition to Health Data Utilities. We partner with HIEs and public health organizations to provide technical leadership and create a forum for shared learning and development.

Please reach out to our Orion Health team to learn about our upcoming activities.

Orion Health is a global healthcare technology company focused on reimagining healthcare for all. We are leading the change in digital health with health and care organizations to improve the wellbeing of every individual with our world-leading Unified Healthcare Platform.
